DESIGN AWARD 2024

INTERNATIONALLY RECOGNIZED DESIGN

Alca is a trendsetter in the world of design. This is confirmed by the awards, which the company has received in recent years. In 2024, we received the second Red Dot award, this time for the series of flush plates Linka and Dot.Dot. The collection also appealed to the jury of the iF Design Award competition in the same year. Alca has also won awards for its WC flush plates in previous years, specifically the Red Dot in 2014 and the iF Design Award in 2018. However, not only flush plates are successful in design competitions, our invisible outdoor drainage channel solution impressed the judges at the ISH trade fair and they awarded it the Design Plus ISH 2023.

ESG – responsibility towards nature and society

At Alca, we are aware of our responsibility towards the environment and society. We actively seek to minimize our impact and sustainability is a core value that influences every aspect of our operations. Our vision is to create quality products that respect the needs of future generations.

ENERGY RECOVERY

Among our efficiency measures, we are implementing energy recovery units in newly established production lines. The air heated during the cooling of production lines is used for heating. Energy recovery is thus the next step in our quest to achieve maximum energy efficiency and sustainability within our operations.

WASTE RECYCLING

We focus on ecological sustainability and efficient waste recycling. We sort plastics and metals that we reuse in production or send for recycling, thereby reducing the need for new raw materials and minimizing the environmental impact.

USE OF RECYCLED MATERIAL

We have set a clear goal – to minimize the impact of our business on the planet. We focus on using recycled plastics, giving new life to materials that would otherwise end up as waste. We design our products with a long durability in mind and pack them in eco-friendly packaging that can be easily recycled. Each step on this journey brings us closer to a more sustainable future that we want to create for generations to come.

COGENERATION UNITS

Alca applies a wide range of cost-saving measures, with annual investments reaching up to hundreds of millions CZK. The system for heating halls with waste heat from injection molding machines in combination with several natural gas cogeneration units is an example of environmentally friendly industrial production.

PHOTOVOLTAIC PANELS

In 2023, we took a significant step towards energy self-sufficiency and sustainability. Photovoltaic panels were installed on all the roofs of the Alca production facility in Břeclav, contributing to a reduction in energy consumption and enabling us to harness renewable energy directly from nature. In addition, we extended the photovoltaic installations to the roofs of the Obelisk Winery and Game Reserve Obelisk, thereby supporting their ecological transformation. These steps are part of our long-term commitment to sustainability and environmental responsibility.

GAME RESERVE OBELISK

Implementation of a unique landscaping project, which restored lost water in the soil and returned home to hundreds of plant and animal species. Work whose importance intervened and recognized academics and whose scope will affect generations to come. That's Game Reserve Obelisk.

DEVELOPMENT OF EDUCATION AT SECONDARY SCHOOLS

Alca is aware of the financial challenges faced by the school apprenticeship system, which is why it focuses on equipping secondary schools and vocational schools with plumbing workshops, where students can get hands-on experience with sanitary technology and acquire the necessary skills.

EMPLOYEE CARE

Having satisfied employees is important to us. In addition to a competitive salary and a modern working environment, we offer benefits such as language courses, 5 bonus days off, fun events and an emphasis on safety. We provide quality equipment, training and ensure compliance with safety regulations so that everyone feels safe at work.

SOCIAL SUPPORT

We bring hope, love and help where it is most needed. We cooperate with the foundation Be Charity and actively support, for example, the Křižovatka Foundation, Zdravotní Klaun, the Children's Laugh Foundation, and the Břeclav Regional Charity.

CROSSBARS MOUNTING FROM THE BACK SIDE

Faster installation thanks to adjustable partitions

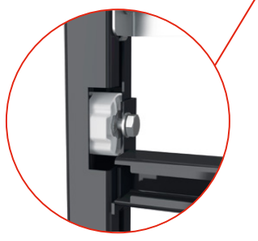

FIXATION SET EASY LOCK FOR MOUNTING TO THE WALL

Even faster and easier installation

The new design allows a simple mounting to the wall in half the time.

Exact setting

Optional additional adjustment to an optimal position using an allen key accessed via the front of the frame.

CROSSBAR POSITION LOCK

Fixing the position with a lock

ASSEMBLY OF URINALS WITH HIDDEN CONNECTION

Just turn the larger galvanized bracket 180° and fasten it first in the order from the top.

The procedure is shown in detail in the installation manual.

VARIABILITY OF WASTE ELBOW DIAMETER

Waste elbow with connection to trap DN32/DN40, for waste DN40/DN50

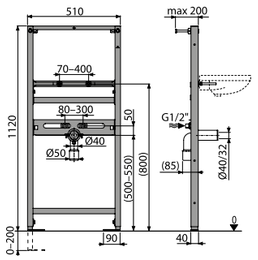

Applies to frames A104, A105

ANCHOR FEET BRAKE

The feet lock system allows setting the necessary building height of the frame profile and then ensure its final position by tightening.

Flush plates for pre-wall installation systems

The exclusivity of WC flush plates lies in precise processing, innovative development and the use of the most modern technologies, thanks to which it offers a wide range of color designs that easily match any interior style. The flush plates are divided into four sections: Basic, Thin, Flat and Special. The primary product line Basic meets the high demands of everyday use, thanks to its long life, constant color and easy maintenance. The Thin category have flat profile, which stands out only five millimeters above the tiles. The premium Flat series brings fine materials to bathrooms, such as stainless steel, brass, aluminum or Czech glass. The range Special offers modern and hygienic solutions, such as flush plates with touch-less sensors, remote control or increased resistance, which are suitable for any bathroom or space.

Compatibility with Alca WC systems

Flush plates Alca are fully compatible with all types of Alca WC systems. Experiment with shapes, materials and colors in your bathroom.

Tilting

For more convenient refilling of toilet tablets, the majority of flush plates are equipped with a tilting system. This allows you to easily tilt the flush plate without the use of any tools, insert the WC tablet into the tablet dispenser and put the flush plate back on.

Anti-fingerprint

The surface of the flush plates has a special protective layer, which does not show fingerprint marks. In addition to the aesthetic function has this adjustment also other benefits. The flush plates need not to be treated so often, thereby significantly increasing their long-life.

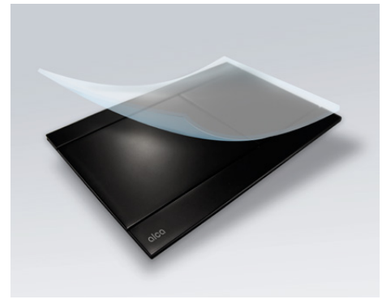

Antibacterial surface treatment

Selected flush plates with black-matt and white-matt finishes come with an antibacterial surface treatment. The upper transparent varnish contains silver nanoparticles, which have antibacterial properties and prevent the spread of unwanted micro-organisms on the surface of the flush plate.

Side fill valves

We have designed the fill valves primarily to be fast, exceptionally resistant to impurities contained in water and to perfectly withstand a wide range of pressures 0.05–1.6 MPa (0.5–16 bar) in various countries around the world.

EASY MAINTENANCE AND FAST SERVICE
Cleaning the filter using **CLICK system** without a need of dismantling the tube

INCREASED DURABILITY AGAINST IMPURITIES
Secured by a **conical shape of the filter**

EXTRA FAST FILLING
Twice as fast filling without the use of a water flow regulator

SILENT FILLING
With a regulator of the water flow

MAXIMUM RELIABILITY
The new membrane works even within the water pressure fluctuations of **0.05–1.6 MPa (0.5–16 bar)**

NO RECOIL
Thanks to the smooth closing of the valve

LONGER LIFETIME
The fill valve is made of a material which **is more resistant against limescale**

UNIVERSAL
Designed for plastic and ceramic **WC cisterns and pre-wall installation systems**

ALWAYS THE SAME WATER LEVEL
Regardless of the water pressure in the pipes

WC seats

soft close

SOFTCLOSE system – Slow closing WC seat cover

The SOFTCLOSE system is characterised by its slow seat closing action. The mechanism within the hinges of the WC seat ensure a smooth and quiet closure onto the ceramics. A big advantage of this system is to protect the WC pan from damage caused by accidental dropping of the seat. It also ensures greater safety and comfort for the user when handling the seat. It is particularly suitable for public areas and for families with children.

Antibacterial

The majority of Alca toilet seats have antibacterial properties. The Antibacterial properties are achieved by the Silver compounds within the material. Testing has proven that the bacterial density on the WC seat surface is reduced.

Duroplast

Toilet seats made of high-quality Duroplast material will satisfy even the most demanding Customers. Duroplast material greatly reduces discomfort of sitting on a cold surface of a WC seat.

click system

CLICK system for easy cleaning

CLICK system on WC seat hinges allows for easier and faster cleaning of the WC pan and seat itself. The seat is released from the pan by pressing the two buttons on the inner side of the seat hinges, allowing it to be lifted clear for cleaning. The seat is easily and quickly returned to its original position by pressing it back onto the hinges.

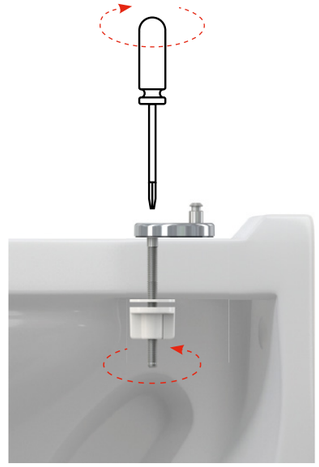

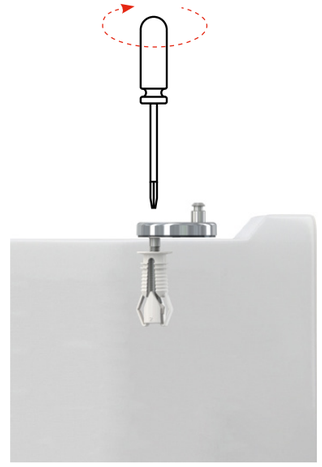

Setting of hinges for perfect compatibility

Easy mounting of Alca seats onto the WC pan is guaranteed thanks to the large range of possible adjustment of the seat hinges. This together with the shape of the WC seats enable them to be fitted to many types of ceramics. The hinges are made of stainless steel and are white powder paint coated to blend them into the ceramic surface, this also ensures long life and durability.

Comfortable top mounting

For Duroplast seats with CLICK system we offer an alternative to the classic bottom mounting hinges. Designed for toilet bowls with limited access the hinge system can be mounted and tightened from the top surface only, eliminating the need to gain access from below.

2in1

The integrated seat insert with magnetic holder

Duroplast seats A603 and A606 are equipped with a fully integrated infant potty seat insert. It is atta-ched to the hinge pins and can be easily removed. The insert is made of lightweight polypropylene material so that a child can safely and simply manipulate the seat. When not use the potty seat insert is retained mag-netically by the seat cover allowing normal adult use.

WC Seats with print

We also offer WC seats with color printing with three themes – flower, shell and zen.

STAINLESS STEEL

These grids have the following codes:

DESIGN – the basis is a stainless steel U-profile, with rounded edges. Two different finishes are available: polished and brushed matt.

POSH – a solid stainless steel plate is attached to the standard U-profile, with clean lines and well-defined edges. Surface finish is brushed matt.

Load class – K3.

GLASS

These grids have the following codes:

GL line – tempered glass

The grids are based on stainless steel U-profiles to which a solid piece of tempered glass is attached, available in a range of colours and with a high gloss finish. The special, toughened glass conforms to the relevant safety regulations EN 12150-2.

Load class – H15.

Shower drain APZ15 Marble

The new generation of stainless steel shower drains APZ15 is aimed especially for design fans. The water is drained by two slots in the pavement of the bathroom that hides the stainless steel shower drain without edges. The view is not optically disturbed by the stainless steel edge neither on the grid nor on the shower drain. Naturally functioning secondary drainage will ensure outflow of moisture under the pavement back into the shower drain body.

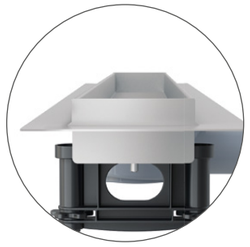

Advantages of the shower drain:

- Design shower drain is suitable for any paving thickness and for large format natural stone boards
- Water drainage is ensured by the slot in the pavement
- Uniform floor surface in the bathroom is achieved by the innovative shower drain and grid construction without edge
- The upper side of grid is covered with a special rough surface to ensure a safe bonding with the embedded tiles

Drainage channel with a grid for embedding tiles or stone

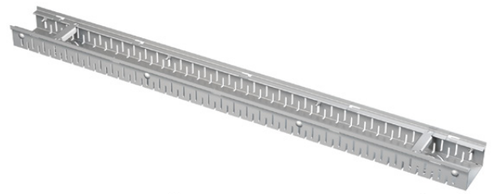

Drainage channels are suitable along facades on roof and ground terraces, in stonework greenery or walkways. The drainage system is linear with the possibility of connecting in the transverse and longitudinal direction.

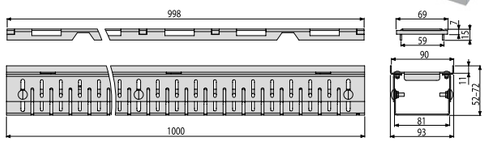

- **Visually clean solution for terrace drainage system**
- **The width of the inlet slot is only 8 mm**
- **Height-adjustable**
- **The possibility of producing atypical solutions**
- **Galvanized or stainless steel solution**

LOCK
- The lock prevents unintentional opening of the lid, overflow of water during heavy rains
- Prevents the access of children at play
- If necessary, it is possible to remove the lock from the rain drum

INLET RINGS
- They are part of each package
- Diameters 80, 90, 100, 110, 125 mm
- They allow the connection of all types of roof gutters and downspouts

BASKET FOR LEAVES AND DIRT
- Captures coarse material (mainly leaves) and prevents clogging of sewer pipes
- The narrow bottom with ribs allows a gradual fall through of rotting leaves into sewerage
- Basket can be easily removed for cleaning

FLAP
- Frost-free odour trap – limits the transmission of gas from canalization
- Prevents the passage of rodents from the waste
- Closes under its own weight and is secured against flooding
- Restrict splashing water from the rain drum when removing the lock case

MATERIAL
- PP enriched with glass fiber
- Resistant to mechanical and thermal damage
- UV stable – resistant to plastic degradation and fading
- In black or grey colours

CONSTRUCTION
- Resistant to deformation during assembly and to the load (class K3 – bearing capacity of 300 kg)
- Ribbing ensures stability on the spot
- Steeper gradient of the rain drum body enables a faster and bigger water flow towards the sewer
- Flow rate 390 l/min.
- Diameter of 110 mm, 125 or 125/110 mm

We make products from recycled materials

We are a responsible company that thinks about future generations and therefore behaves respectfully towards the environment. We produce from recycled material and thus transform waste into a meaningful product. In addition, we rid the planet of waste plastic. We pack our products in recyclable materials and therefore do not even produce secondary waste.

- **Made in Czech Republic**
- **Low carbon footprint**
- **Zero waste production process**
- Top quality – **strength, tightness, long service life**
- Sustainable products **with a low carbon footprint**
- We pack products made from **recycled material in recyclable LDPE film**

Determining the lenght of Alca bath wastes

Determining the necessary length of the bath waste for different bathtub models is very easy. The waste hole in the bottom of the tub and an the overflow opening in the wall of the tub are combined perpendiculars (Hmax and H2). By adding the perpendicular lines, then we get the desired waste length (L).

Hmax + H2 = L

Double-connector for attaching home appliances to the trap

The elbows are designed for connecting hoses to the water supply and condensate for various types of traps. Thanks to the variable diameters of the connectors it is possible to connect it to almost all types of common household appliances such as. washing machine, dishwasher, dryer, condensing boiler, air conditioning, heat recovery, etc.

Double elbows allow you to link two waste water sources simultaneously. It includes non-return valves to prevent backflow of water into the individual appliances. This solution is suitable for systems that do not have their own return valves. Partition regulating water flow directs water from the second elbow.

YOURS IN EVERY DETAIL

Perfect match

It is possible that we can match your personal taste with charming pink tones. Or you might prefer a dazzling gold colour? Maybe your natural match is the gun metal. No matter what you decide, you can always rely on certain things. The perfect colour fastness and the resistance to abrasion. And so even your bathroom can be brought to perfection in every last detail.

Determining the lenght of Alca bath wastes

Determining the necessary length of the bath waste for different bathtub models is very easy. The waste hole in the bottom of the tub and an the overflow opening in the wall of the tub are combined perpendiculars (Hmax and H2). By adding the perpendicular lines, then we get the desired waste length (L).

Hmax + H2 = L

Complete assortment of sanitary technology, system walls and piping systems

alca

Sanitary technology, system walls

Alca was founded in 1998, since 2021 it is part of the Alca Group. The largest manufacturer of sanitary ware in Central and Eastern Europe on an area of over 110,000 m², it produces more than 1,000 sanitary products – valves, traps, WC systems, shower drains, floor drains, toilet seats and other assortment.

Furthermore it is a manufacturer of prefabricated system walls Alcasystem. This modular system for dry construction offers a complex solution for water supply, waste, electrical installation, sanitary technology and sound insulation, making it ideal for medium and large projects.

FV PLAST

Piping systems, floor heating and ceiling cooling systems

FV - Plast was founded in 1990 and has been part of the Alca Group since 2021. Since its establishment, it has been involved in the production of a complete range of pipe systems for water distribution and heating. The product portfolio also includes floor heating and ceiling cooling systems. Currently, FV - Plast is the largest producer of PP-RCT pipes in Central Europe and the only Czech producer of PERT and AL-PERT pipes.
